## Cat Safe Birthday Cake

Makes: 2 small cakes

Prep time: 20mins

Cooking time: 15mins.

### Ingredients:

1 egg

½ can tuna

2 tablespoons flour

2 tablespoons shredded/grated cheese –any, but cheddar or American are good options

Defrosted shrimp (optional)

### Directions:

Preheat oven to 350°F.

Break up tuna into a medium bowl.

Lightly beat egg in a separate bowl then mix with tuna.

Add the flour and cheese.

Stir to combine.

Scoop batter into cupcake tin or silicone cups. If cupcake tin, spray non-fat cooking spray in first, or use paper cupcake wrappers (remove before feeding)

Bake for 15mins.

Wait to cool and then place small pieces of shrimp on top.

Can feed whole, or break into pieces to cat. I find the cats need it broken it up or else they can't figure out how to bite pieces off. Be sure and have some for each cat on separate plates to avoid any competition. They will all want some!
